

Introduction

The strobe light and siren alarm is an intelligent alarm device that integrates sound and light alarms, and is compatible with GS1 series devices. It adopts a strong magnetic base design, which can be easily and firmly attached to various ferromagnetic metal surfaces without drilling holes for wiring, and can be deployed quickly and flexibly. It is suitable for industrial plants, warehousing and logistics, mechanical equipment, transportation and other places that require timely warnings and alarms.

Applications

It is widely used in industrial automation equipment, environmental monitoring system early warning, warehousing and logistics, security/access control systems and other scenarios.

Features

- Magnetic installation, flexible deployment
- Sound and light alarm, sensitive response
- Waterproof and dustproof
- DC 35135 interface

Specification

Specification	
Product Model	UB-PA-N1
Working Voltage	12V、24V、220V
Dimensions	94mm x 178mm
Net Weight	0.48kg
Connector	DC 35135
Light Source Type	LED
Power	10W
Loudspeaker Decibel	110dB

Note

1. Please ensure that the installation surface is flat, clean, and made of metal with good ferromagnetic properties to ensure secure adhesion and prevent accidental detachment due to insufficient suction.
2. Avoid strong light, high-powered noise, and other sources of interference around the audible and visual alarm.
