

User Guide

Introduction

This product is an outdoor PVC waterproof resistant case designed specifically for temperature and humidity recorders, compatible with our WS1/WS1Pro series devices. Made from high-quality, environmentally friendly PVC material, it offers excellent waterproof and dustproof performance, effectively protecting the device from rain, dust, and UV rays in complex outdoor environments, thereby extending the device's service life.

Applications

Widely applicable in various scenarios such as greenhouse cultivation, forestry management, warehousing, and cold chain logistics.

Features

- IP53
- Environmentally friendly and durable
- Transparent window
- External probe

Specification

Specification	
Product Model	UB-WB-A1
External Dimensions	14.5 * 21 cm
Window Dimensions	8.5 * 12.5 cm
Net Weight	130 g
Material	Environmentally friendly 0.3 mm PVC
Color	black
Waterproof Rating	IP53

Note

1. The bottom of the product must not be immersed in water. The bottom has a probe connection port. If used with an external probe, it will reduce dust and water resistance.
2. Avoid direct contact with sharp objects during use to prevent puncturing or tearing the bag.
