

## Introduction

This product is a standard 12V DC power adapter featuring a high-efficiency voltage regulation circuit. It supports a wide input voltage range of 100–240V AC, offering excellent compatibility. The casing is made from eco-friendly, flame-retardant materials, and the unit is lightweight and portable. It is plug-and-play, meeting the day-to-day power requirements of your devices.

## Applications

It is widely used in industrial control systems, telecommunications network equipment, smart devices and environmental monitoring equipment.

## Features

- Stable output
- Compact and portable
- Plug-and-play
- Wide input voltage range, suitable for a variety of scenarios

## Specification

Specification	
Product Model	UB-AC-A2
Input Voltage	AC 100-240V~50/60Hz
Output Voltage	DC 12V
Dimensions	44 * 64 * 31mm
Weight	88 g
Connector Type	DC 5521

## Note

1. Before use, please ensure that the device's voltage and current requirements match the adapter's output specifications.
2. Do not use this product in high-temperature, damp or flammable environments.
3. Do not attempt to dismantle the adapter yourself. If you notice any abnormalities (such as overheating, unusual noises or odours), stop using it immediately.
